

B11: the two matching directions must be read separately

Source law: source table minus target table

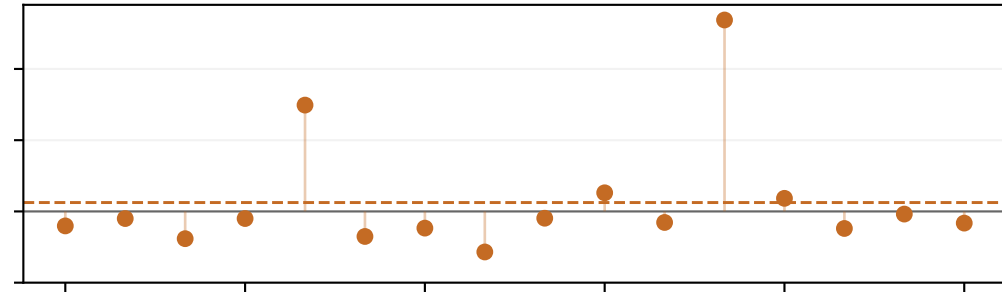

Target law: target table minus source table

64-tick adapter-return difference: matched minus mismatched table

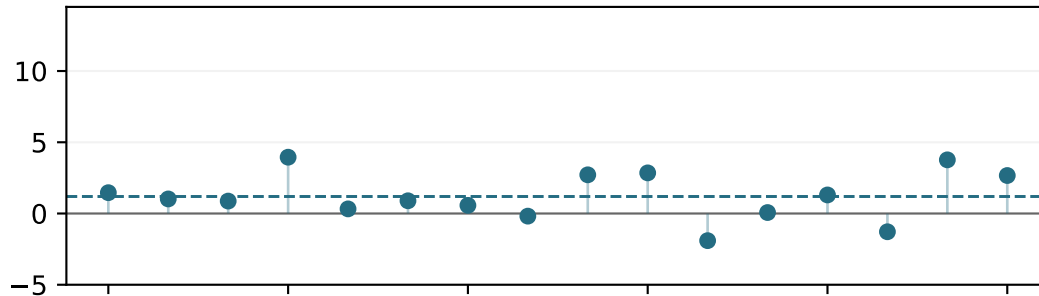

Base 95401: mean +0.877; positive 14/16

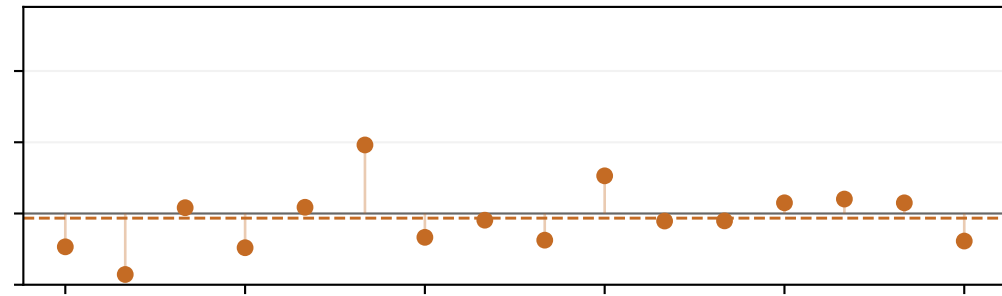

Base 95401: mean +0.623; positive 4/16

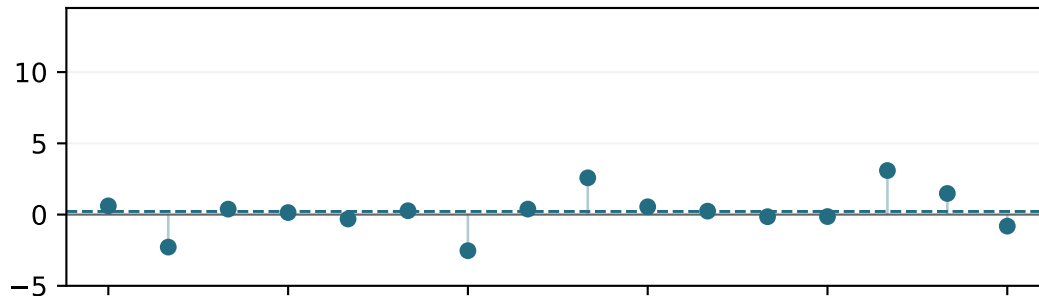

Base 95402: mean +1.193; positive 13/16

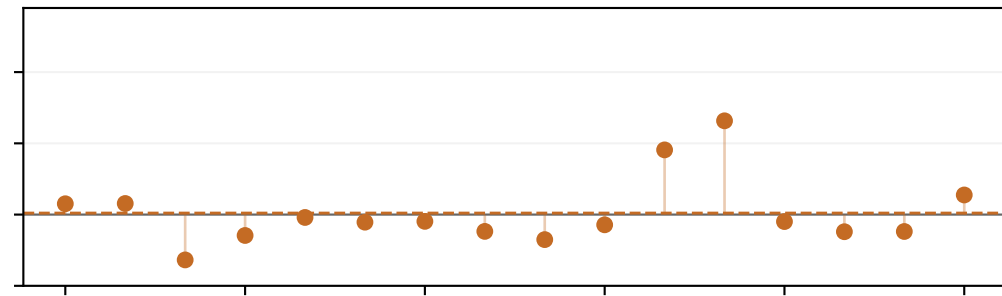

Base 95402: mean -0.325; positive 7/16

Base 95403: mean +0.220; positive 10/16

Base 95403: mean +0.103; positive 5/16

Paired world (all 16 retained)

Paired world (all 16 retained)

Equal-weight fixed-base means: D_{source} +0.764 (conditional MCSE 0.202); D_{target} +0.134 (conditional MCSE 0.437).

Dashed lines: base means. Shared axes. Zero new fits; 48 paired worlds on three old bases.

Conditional deployment uncertainty excludes learning uncertainty. No world removed or relabeled.
